Saved reproduction check — 11 November 2026

Separate rerun of the packaged signal module against the preserved October 23 and November 9 observations.

Exit status: 0

Numeric comparison tolerance: relative 1e-7 or absolute 1e-6. Gate decisions and case identifiers must match exactly.

Compiler: Apple clang version 21.0.0 (clang-2100.1.1.101)

Source: features.c

Clean check: all 17 saved rows reproduced (15 signals and 2 controls).

Saved-input replay: all 194 rows reproduced, including all eight features and gate decisions.

clean_sine: 15/15 detected

noisy_sine: 135/135 detected

mixed_sines: 24/30 detected

movement_only: 0/4 detected

noise_only: 0/9 detected

zero: 0/1 detected

Mixed-motion misses: case_175, case_176, case_177, case_178, case_179, case_180

This verifies reproduction of the saved observations, not clinical performance or acceptance criteria.

Historical inputs and results were not modified.
