Progress Report 2 feedback

Assessment

14.8/20 - Fail, major revision.

Feedback date: November 3, 2026, 2:33 p.m.

Strengths

Clear monitoring scope, requirements linked to verification, preliminary tests with appropriate limitations, and risk analysis connected to design decisions.

Required changes

Confirm supervisor agreement with the comparison process. Establish the remaining performance and usability targets. Test noisy signals and ordinary movement. Add likelihood and severity assessments to prioritize risks. Update the title to match monitoring. Use the findings to compare alternatives and justify the selection.

Before PR3.
